Passionate about research methods in your field?
Interested in learning and contributing **geography**
or **environmental sciences methods teaching**?

What is digilego?

digilego is an Erasmus+ Digital Readiness Strategic Partnership between Trier University, the Luxembourg Institute for Socio-Economic Research, the University of Hull, and the National University of Ireland Galway.

digilego's objectives are

- (1) to enhance capacity of HE teachers in geography and environmental sciences programmes through training in digital and blended methods delivery and
- (2) to co-create high quality and shareable open educational resources (OERs) through a participatory web platform.

Whether through sharing your expertise in project workshops, networking with colleagues abroad, the creation of OERs, or as a participant in learning and training events (e.g., one of our virtual fieldtrip trainings in the Irish National Park or the German capital), there are various ways in which you can get involved.
